

Gemini for Google Workspace: A new and powerful way of working with generative AI

How generative AI helps teams get more done and grow together

With Gemini for Workspace, teams can connect, create, and collaborate from anywhere, on a variety of devices, using the power of generative AI. It helps people boost productivity and free up time for more impactful work. All of this is done in a smooth and easy-to-use way, without the need for code, new interfaces, or multiple buttons and steps.

Gemini adheres to our structurally safe [approach to security](#). In fact, Google keeps more people safe online than anyone else, and our priority is to protect the confidentiality and privacy of your data.

Gemini boosts productivity by transforming day-to-day tasks

✓ Focus employees on high-value activities

Get a running start on time-consuming tasks by quickly automating processes and generating content, opening more opportunities for high-priority work.

✓ Improve business outcomes

Gemini can help improve company performance and revenue by increasing employee productivity and generating more output.

5 ways Gemini can help your team work smarter

Say goodbye to writer's block with *help me write*

- Draft content for emails, sales proposals, project plans, blog posts, and more.
- Type a prompt with details about your writing task and Gemini will generate a full draft in Gmail or Google Docs.
- Refine content by adjusting the length, tone, and style with just a few clicks.

Organize and act on your data faster than ever with *help me organize*

- Automatically create an event agenda, production schedule, or budget template.
- Describe the type of information you'd like to organize to create tables in Google Sheets.
- Reduce manual data entry with automatic data classification and cell labeling.

Convey your artistic vision from a simple prompt with *create an image*

- Generate unique images for campaign concepts, sales pitches, and event invites.
- Use simple text prompts in Google Slides to generate compelling visuals.
- Pick from a set of options and adjust the image style until you find the right fit.

Engage more meaningfully with *help me connect*

- Enhance the quality of client meetings, brainstorming sessions, and virtual celebrations.
- Use Gemini to make your background in Google Meet reflect your personality or the meeting topic.
- Automatically enhance video and audio.

Build business apps and workflows using simple language

- Build no-code apps that support tasks like managing IT ticketing and tracking customer requests.
- Connect your data to AppSheet to quickly develop custom solutions that simplify daily workflows.
- Automate data updates, create user-friendly interfaces, and deploy across your team without a single line of code.
